SUMMARY

Informatics graduate (GPA 3.89/4.00) and BNSP-certified Junior Web Developer, currently working as a Software Developer. Builds full-stack web applications and REST APIs with Laravel, React.js, Next.js and TypeScript, from company websites and internal business systems to data import and migration tools. Built DASSCare, a mental health screening web app used by real users and validated with professional psychologists, and an Excel-to-database import feature that reduced manual data entry for a local government agency. Experienced in data cleansing and validation for structured databases.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Jawa Timur Surabaya
Bachelor of Informatics - GPA 3.89/4.00 Aug 2022 - Sep 2026

WORK EXPERIENCE

PT Wira Sandi Jakarta
Software Developer Oct 2026 - Present

- Designed and developed the PT Wira Sandi company profile website to strengthen the company's digital branding.
- Completed master data in the HRMS, including clients, locations/units, positions and departments.
- Cleaned and validated the employee database, covering national ID numbers (NIK), email addresses, duplicate records and data formatting.

PT Winnicode Garuda Teknologi Bandung (Remote)
Full-Stack Developer Intern Feb 2025 - Jun 2025

- Developed and maintained a company website using Laravel, building REST API endpoints and refining web features based on project requirements.
- Performed debugging and testing to identify and resolve functional issues and improve system reliability.
- Created technical documentation and development reports to support system maintenance and knowledge sharing.

Dinas Komunikasi dan Informatika Kabupaten Kutai Kartanegara Tenggarong
Programmer Intern Jul 2024 - Aug 2024

- Developed an Excel-to-database import feature to streamline data entry and reduce manual data processing.
- Collaborated with senior developers to ensure system features were properly implemented and tested.

PROJECTS

DASSCare - Mental Health Screening Web Application

- Developed a web-based mental health screening system based on DASS-21 scoring rules.
- Implemented responsive interfaces for the questionnaire, results visualization and screening history, used by real users.
- Worked with professional psychologists to understand, validate and translate psychological assessment requirements into system logic.

ApplyTrack - Job Application Tracker

- Built a full-stack web app for job seekers to track applications, interview schedules and hiring progress in one place.
- Developed an analytics dashboard with a hiring-funnel view, response rates and follow-up reminders for applications without a reply.
- Secured accounts with email verification, Google sign-in, password reset and login lockout protection; supports Indonesian and English.

TRAINING

Bangkit Academy Surabaya

Android Developer Sep 2024 - Dec 2024

- Developed a machine-learning-powered mobile application with Kotlin as part of a collaborative team.
- Integrated machine learning functionality to support the application's core user features.
- Integrated individual team modules into a unified application.

CERTIFICATIONS

- Junior Web Developer - BNSP
- Android Intermediate - Dicoding Indonesia
- English Proficiency Test (EPT) - UPN "Veteran" Jawa Timur, Jun 2026 (Score: 503)
